Portfolio: <https://vadevelopments.github.io/portfolio/>

SUMMARY

DevOps Engineer with 3+ years of experience building and operating production platforms across cloud, containerized, and enterprise environments. Experienced in infrastructure automation, Kubernetes orchestration, CI/CD pipelines, and cloud deployments using AWS, Terraform, and Ansible. Strong background in full-stack engineering (Next.js, Django, FastAPI), enabling end-to-end ownership from application architecture to deployment, observability, and operations. Proven experience supporting large-scale cybersecurity platforms, improving deployment reliability, and leading engineering initiatives.

TECH STACK

Cloud & Infrastructure	AWS (EC2, S3, SES, Route 53, ECR, CloudWatch) • Terraform • Ansible • Proxmox
Containerization & Orchestration	Docker • Kubernetes • Harbor • Portainer
CI/CD & DevOps	Jenkins • GitHub Actions • CI/CD • Linux • Nginx
Monitoring & Observability	Prometheus • Grafana
Backend	Python • Django • FastAPI • Django REST Framework • Django Ninja • Node.js • Express.js
Frontend	Next.js • React • JavaScript • HTML • CSS
Databases & Messaging	PostgreSQL • MongoDB • Redis • Kafka • Celery

EXPERIENCE

DevOps Engineer / Senior Full-Stack Developer

CyTech Development and Operations Inc. | Oct 2023 – May 2026

Progressed into DevOps leadership while continuing ownership of application architecture, platform operations, infrastructure automation, and production reliability..

- Designed and maintained CI/CD pipelines, reducing deployment time by ~40% and improving release reliability.
- Managed containerized production workloads using Docker and orchestrated environments using Kubernetes.
- Provisioned and maintained infrastructure using Infrastructure-as-Code practices with Terraform and Ansible.
- Automated VM lifecycle and environment provisioning in Proxmox to support scalable deployments.
- Deployed and managed AWS services including EC2, S3, SES, and Route 53.
- Operated and monitored production environments using Grafana and Prometheus, improving visibility and reducing incident response time.
- Managed 30+ containers across staging and production environments with Nginx reverse proxy and load balancing.
- Built backend APIs and services using Django and FastAPI supporting enterprise cybersecurity operations.
- Implemented Celery and Kafka workflows for asynchronous and distributed processing.
- Optimized PostgreSQL performance and improved API response times by up to 30%.

- Led engineering delivery during organizational transition, mentoring developers and establishing operational standards.

Bubble.io Developer • [Freelance](#)

Jan 2023 – Mar 2023

- Built web applications using Bubble.io: designed workflows, DB structures, and integrated third-party APIs for client projects.

Freelance Web Developer • [WordPress & Squarespace](#)

2020 – 2022

- Delivered responsive, branded websites for clients; configured themes, plugins, and optimized site performance.

NOTABLE PLATFORM CONTRIBUTIONS

Aquila Enterprise Cybersecurity Platform — All-in-one platform supporting governance, risk management, incident response, and security awareness.

Modules led: SCRM, CSRM, CPP, CTCA, ISSC, ISPA.

Modules assisted: CIM, SOAR, DLP.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Engineering

Cagayan de Oro College – Phinma Education Network

CyTech Managers Training

2025

Empowering Leaders: Soaring High, Securing Core

Village88 Software Development Training

2023

Web Fundamentals • Advanced PHP • Advanced JavaScript • Docker • CI/CD

Department of Information and Communications Technology (DICT)

2022

Python Programming • Data Analysis • Data Visualization • Flask Web Applications

EARLY EXPERIENCE

Team Lead / Product Controller / Trainer • [Jollibee Foods Corporation](#)

Jan 2012 – Jul 2017

Supervised high-volume operations and trained staff. Recognized with Best Product Controller (x3) and Certificate of Excellence (x2).
