SUMMARY

Full-Stack Developer with extensive experience building scalable web applications across frontend, backend, and DevOps environments. Skilled in modern technologies including Next.js, React, Python, Django, FastAPI, and PostgreSQL, with a strong focus on delivering production-ready systems using Docker, CI/CD pipelines, and infrastructure automation. Progressed from Frontend Developer to DevOps Manager, developing deep expertise across the entire software development lifecycle—from UI development and API design to deployment, monitoring, and system reliability. Proven track record in designing REST APIs, asynchronous processing systems, and event-driven architectures using Kafka, Celery, and Redis, while optimizing performance and deployment efficiency. Experienced with AWS services such as EC2, S3, SES, and Route 53, and recognized for strong cross-team collaboration, technical leadership, and mentoring, consistently enabling teams to deliver complex, high-reliability cybersecurity platforms under tight deadlines.

TECH STACK

Frontend:	Next.js • React • JavaScript • HTML • CSS
Backend:	Python • Django • FastAPI • Django REST Framework • Django Ninja • Node.js • Express.js
Databases:	PostgreSQL • MongoDB • Redis
Messaging & Async Processing:	Kafka • Celery
DevOps & Infrastructure:	Docker • CI/CD • Jenkins • Nginx • Ansible • Proxmox • Harbor • Portainer
Cloud Platforms:	AWS (EC2, S3, SES, Route 53)
Monitoring & Tools:	Prometheus • Grafana • Git • Linux • Infisical

ACHIEVEMENTS

Career Progression

Frontend Developer → Senior Full-Stack Developer → Interim Manager → DevOps Manager

Technical Contributions

- Contributed to the development of Aquila, an all-in-one enterprise cybersecurity platform supporting governance, risk management, incident response, and security awareness programs.
- Led the development of several core platform modules, including:
 - Supply Chain Risk Management (SCRM)
 - Charters, Policies and Procedures (CPP)
 - Cyber Training, Culture and Awareness (CTCA)
 - Information Security Steering Committee (ISSC)
 - Information Security Pressure Analysis (ISPA)
- Assisted in the development of additional security capabilities, including:
 - Cyber Incident Management (CIM)
 - Security Orchestration Automation and Response (SOAR)
 - Data Loss Prevention (DLP)
- Built scalable RESTful APIs and microservices using Python, Django, and FastAPI.
- Implemented Celery, Redis, and Kafka for asynchronous and event-driven processing.
- Optimized PostgreSQL queries and indexing strategies, reducing API response times by up to 30%.

DevOps & Infrastructure

- Automated VM provisioning in Proxmox using Ansible, supporting multiple development and production environments.
- Built CI/CD pipelines that reduced deployment time by ~40%.
- Managed 30+ Docker containers across staging and production environments, improving deployment consistency and reducing environment-related issues.
- Configured Nginx reverse proxy and load balancing improving system uptime.
- Managed PostgreSQL and MongoDB databases supporting production services.
- Implemented Grafana monitoring dashboards for 20+ services, improving incident detection time and reducing downtime.

Leadership Impact

- Led development teams during leadership transition while maintaining project delivery timelines.
- Coordinated collaboration between engineering and operations teams to resolve technical blockers.
- Mentored engineers on system architecture, debugging strategies, and production deployment practices.

EXPERIENCE

DevOps Engineer

CyTech Development and Operations Inc.

December 21, 2026 – Present

- Lead DevOps operations for enterprise cybersecurity platforms across multiple environments.
- Provision and manage VM infrastructure in Proxmox supporting staging, testing, and production environments.
- Build and maintain CI/CD pipelines, improving deployment speed by ~40%.
- Manage Docker-based environments for consistent application deployment.
- Configure Nginx servers for secure application hosting and traffic routing.
- Provision and maintain PostgreSQL and MongoDB databases supporting backend services.
- Built centralized monitoring dashboards using Grafana, improving visibility across infrastructure and enabling faster incident response.

Interim Manager

CyTech Development and Operations Inc.

Oct 2025 – Dec 2025

- Managed engineering roadmap, task prioritization, and cross-team coordination.
- Led development teams during leadership transition while maintaining delivery timelines.
- Improved team collaboration between engineering, product, and operations groups.

Senior Full-Stack Developer

CyTech Development and Operations Inc.

December 2023 - Oct 2025

- Developed full-stack enterprise applications using Next.js, React, Django, and FastAPI, supporting internal cybersecurity operations platforms.
- Built APIs and backend services supporting enterprise integrations.
- Implemented Celery-based background jobs and Kafka messaging workflows.
- Managed relational databases using PostgreSQL.

Frontend Developer

CyTech Development and Operations Inc.

October 2023 - December 2023

- Developed responsive web interfaces using Next.js and React.
- Built dashboards and UI components for enterprise cybersecurity tools.
- Improved UI performance and resolved frontend issues.

Bubble.io Developer

Freelance

January 2023 – March 2023

- Developed responsive web applications and business websites using Bubble.io no-code platform.
- Designed and implemented application workflows, database structures, and dynamic UI components.
- Integrated third-party APIs and plugins to extend application functionality.
- Built user authentication, dashboards, and data management features for client projects.

Freelance Web Developer

WordPress & Squarespace

2020 – 2022

- Implemented custom UI designs and layouts on WordPress and Squarespace websites.
- Developed responsive and visually appealing pages tailored to client branding.
- Configured themes, templates, and plugins to enhance website functionality.
- Optimized site performance, user experience, and cross-browser compatibility.

CERTIFICATIONS & TRAINING

CyTech Managers Training (July 1, 2025 – August 15, 2025)

Empowering Leaders: Soaring High, Securing Core

Village88 Software Development Training (January 2023 – March 2023)

Web Fundamentals • Advanced PHP • Advanced JavaScript • Docker • CI/CD

Department of Information and Communications Technology (DICT) (July 2022 - November 2022)

Python Programming • Data Analysis • Data Visualization • Flask Web Applications

EARLY EXPERIENCE

Team Lead / Product Controller Trainer

Jollibee Foods Corporation

Jan 2012 – Jul 2017

- Supervised operations and trained staff across high-volume service environments.
- Maintained product quality, inventory accuracy, and operational efficiency.
- Recognized multiple times for operational excellence.

Awards

- Best Product Controller – Feb 2017
- Best Product Controller – Jul 2016 & Dec 2016
- Certificate of Excellence – Jul 2015
- Certificate of Excellence – Jul 2012

EDUCATION

Bachelor of Science in Computer Engineering

Cagayan de Oro College – Phinma Education Network
